As part of the ongoing intention by the Academic Publishing Pte. Ltd. (<http://ojs.acad-pub.com/>), to create new and beneficial open access publication opportunities, the journal *Nano and Medical Materials* (ISSN: 2811-0285) (<http://ojs.acad-pub.com/index.php/NMM>), launched a project named Section Collections, which can help readers and authors to search the publications with congeneric topics with diverse backgrounds that cover the various facets of the research topic.

Nine sections have been launched successfully since we started this project, namely:

1) “Nano Clinical Medicine”, edited by Prof. Dr. Maria de Lourdes Pereira, Prof. Dr. Muhammad Nawaz, Prof. Dr. Fátima Macedo, and Dr. Seyyed Shamsadin Athari,

<http://ojs.acad-pub.com/s.php/index/detail?id=6>

2) “Synthesis, Interfaces and Nanostructures”, edited by outstanding experts from different countries, Dr. Giuseppe Prestopino, Dr. Giuseppe Arrabito, Dr. Banavoth Murali, *et al.*,

<http://ojs.acad-pub.com/s.php/index/detail?id=9>

3) “Nano Drug Delivery”, edited by Prof. Dr. Carmela Saturnino, Dr. Sayan Ganguly, Prof. Dr. Ana Figueiras, *et al.*,

<http://ojs.acad-pub.com/s.php/index/detail?id=8>

4) “Nanomaterials and Biosensors”, edited by Prof. Dr. Mohammed M. Rahman, Prof. Dr. Pier Gianni Medaglia, Dr. Mani Govindasamy, *et al.*,

<http://ojs.acad-pub.com/s.php/index/detail?id=4>

5) “Nano Diagnostics”, edited by Dr. Pallavi Shinde,

<http://ojs.acad-pub.com/s.php/index/detail?id=11>

6) “Regenerative Nanomedicine”, edited by Prof. Dr. Aurel Popa-Wagner, Prof. Dr. Feng-Huei Lin, Prof. Dr. Ashim Gupta, *et al.*,

<http://ojs.acad-pub.com/s.php/index/detail?id=5>

7) “Nanotoxicity”, edited by Dr. Stefano Ravaioli, Prof. Dr. Luc Ferrari, Prof. Dr. Mohammad Mehdi Ommati, *et al.*,

<http://ojs.acad-pub.com/s.php/index/detail?id=10>

8) “Nanofabrication and Nanobiotechnology”, edited by Prof. Dr. Qing Lou, Prof. Dr. Maoquan Chu, Dr. Mazen Alshaer, *et al.*,

<http://ojs.acad-pub.com/s.php/index/detail?id=3>

9) “Nano Biomaterials and Tissue Engineering Applications”, edited by Dr. Sara Moradi, Dr. Dmitry Olegovich Bokov, Dr. Arjak Bhattacharjee, *et al.*,

<http://ojs.acad-pub.com/s.php/index/detail?id=7>

Let me stress here the benefits of this Section Collections program.

Benefits for Sections Editors

- Sections enhance editors’ network of scientific collaboration;
- Editors can gain insights into trends and growth areas within their areas of research and beyond;
- Editors can find out how cutting-edge topical sections, presented in an open-access resource, increase research impact;
- Sections further strengthen cooperation between fellows in various disciplines.

Benefits for Authors

- Authors can submit papers to the same Sections and benefit from broader readership and visibility;
- Authors can discover multi-disciplinary applications and develop new ideas;
- Sections help to share reviews, original articles, case reports, opinions, and perspectives for interdisciplinary topics;
- Sections disseminate research focusing on specific interdisciplinary themes more widely and more efficiently;
- Sections allow authors from different research areas to unite around one subject.

I encourage potential contributors to seize the opportunity offered by *Nano and Medical Materials*, to publish papers with high quality for these Sections. We look forward to receiving your contributions.
